DETAILED ACTION

Claim Objections

1. Claims 1-6 are objected to because of the following informalities: Claim 1 recites in the preamble "A method for detecting a leakage in a pipeline," however, does not conclude with the determination of "the leakage." The claim must conclude with a recitation on the determination of a leakage based on the recited method steps, and in the instant case, it appears the leakage is determined by the detection of a change in pressure (P) at the front of the solution column. No new matter should be entered, and the claim must be amended to add this relationship. As to claim 4, portions of the claim are capitalized. The only capitalization allowed in a claim is at the beginning. The Examiner strongly suggests a thorough review of all pending claims for any other minor objections that the Examiner has possibly overlooked. Lastly, Applicant is reminded that any limitations recited within parenthesis are not considered to be part of the claim(s). Appropriate correction is required.

Conclusion

2. This application is in condition for allowance except for the following formal matters:

Objections to claims 1 and 4.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
